## About the Program

TechLabs provides an after-school enrichment STEM (Science, Technology, Engineering, Math) program that engages students in some of the fastest growing careers of the 21st Century in a fun and safe environment. Kids are provided with web and hardware resources that they can use to practice the skills they learn in class at home, or anywhere they can access the internet.

## Campus Description

- Currently offered at GGG Stadtbibliothek Schmiedenhof and Basel West Library (see Schedule on Back Page)
- Once per week classes meet for 75 minutes after school
- Kids can bring their own Internet ready computer if preferred
- Each registered child will receive a complementary library card
- Course program is in English, basic English skills are therefore advantageous
- Course instructors speak German
